

INSECTICIDE

# BIFEN G/N 7.9F SELECT™

GOLF COURSE AND NURSERY TERMITICIDE/INSECTICIDE.

**Bifen G/N 7.9F Select™** is an odorless, non-irritating to skin, non-phytotoxic residual insecticide that gives superior, long lasting control. The active ingredient, bifenthrin, not only features a wide range of pest control but is approved for use on golf courses, sod farms, and nurseries. **Bifen G/N 7.9F Select** is intended for use and storage by commercial applicators.

## PRODUCT FEATURES

- Controls numerous insects and mites on trees, shrubs, foliage plants, non-bearing fruit and nut trees, and flowers.
- Can be incorporated into potting media for the control of imported fire ants.
- Use as a preventive treatment for larval control for such pests as white grubs, black vine weevil, and Japanese beetle.

## LABELED USES

- Commercial non-food use on indoor and outdoor ornamentals
- Nurseries
- Golf course turf
- Sod farms

See label for complete application guidelines and restrictions.

### ACTIVE INGREDIENT

7.9% bifenthrin

### IRAC GROUP

3A

Flowable

### CHEMICAL FAMILY

Group 3A Type 1 pyrethroid

### COMPARE TO

Talstar® Select

### MODE OF ACTION

Effective by contact or ingestion. Affects the central and peripheral nervous system by interfering with sodium channel gates.

### RESTRICTED USE

Yes

### SIGNAL WORD

Caution

### PACKAGING

4 x 1 gal

### EPA REG NUMBER

89442-24

# BIFEN G/N 7.9F SELECT™

## GOLF COURSE AND NURSERY TERMITICIDE/INSECTICIDE.

### APPLICATION INFORMATION

#### Ornamentals

Apply 0.025 to 0.2 lbs ai/A (5 to 40 fl. ozs.) of **Bifen G/N 7.9F Select™**. Provided the maximum label rate (0.2 lbs. ai/A or 40 fl. ozs.) is not exceeded, **Bifen G/N 7.9F Select** can be diluted and applied in various volumes of water. It may also be applied through low-volume application equipment by dilution with water or other carriers. Refer to dilution chart on label for specific instructions.

#### Imported fire ant (IFA) quarantine treatment

For Imported Fire Ants (IFA) in potting media (including balled and containerized nursery grown ornamental trees, shrubs, plants, flowers, conifers, bushes, Christmas trees, and non-bearing fruit and nut-trees). **Bifen G/N 7.9F Select** is approved and can be used in accordance with the USDA Imported Fire Ant Quarantine Program. **Bifen G/N 7.9F Select** may be applied either as a high-volume drench treatment, soil incorporated, or as a topical application.

#### Turf (Golf courses and sod farms)

During periods of high pest pressure or for maximum residual control, **Bifen G/N 7.9F Select** can be applied at up to 0.1 lb. ai/A (20 fl. ozs.), (0.2 lb ai/A or 40 fl. oz. for ants, imported fire ants and mole crickets). **Bifen G/N 7.9F Select** may be applied as a surface or sub-surface treatment. To get uniform coverage when treating dense and/or long turf foliage use application volumes of up to 10 gallons per 1000 square feet. For low-volume applications (less than 2 gallons/1000 square feet), the treated are should be irrigated with at least 0.25 inches of water immediately following treatment to ensure control of sub-surface pests such as, but not limited to, mole crickets.

### LABELED INSECTS

Annual bluegrass	Chinch bugs	Mites	Scorpions	Weevils
Bill bugs	Fire ants	Mole crickets	Termites	
Carpenter ants	Fleas	Mosquitoes	Ticks
