

NEMATICIDE/INSECTICIDE

CRESCENDO®

FOR THE CONTROL OF NEMATODES AND INSECTS
IN TURF AND LANDSCAPES.

Crescendo® is a microbial-based, broad-spectrum, OMRI-listed biological nematicide/insecticide used for the control of nematodes and insect pests in turf and landscapes. It contains a heatkilled biological multi-site active ingredient that repels, stops feeding, reduces reproduction, and induces mortality to prevent damaging populations of sucking and chewing insects, flies, and mites. **Crescendo** provides nematode control by reducing the number of eggs and second-stage juveniles in treated soil. Improved turfgrass quality and root initiation have been observed after applications of **Crescendo**.

PRODUCT FEATURES

- Biological nematicide/insecticide.
- OMRI listed.
- Direct mortality on endo and ectoparasitic nematodes.
- Reduces egg mass formation.
- Prevents juvenile to adult molting.
- No seasonal limit on the number of applications.
- Carries no bee restriction, easy on beneficials.
- Broad tank-mix compatibility with pesticides and fertilizers.
- Can be used on greens, fairways, roughs and tees.

LABELED USES

- Golf courses
- Turfgrass
- Ornamental grasses
- Woody ornamentals – shrubs, trees,
- Conifers, broadleaves,
- Deciduous trees

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENT

30.0% *Chromobacterium subtsugae* strain PRAA4-1T and spent fermentation media*

*Contains not less than 1,000 cabbage looper killing units (CLKU)/mg

IRAC GROUP

UNB

FORMULATION

Water dispersible granule

CHEMICAL FAMILY

Biological

COMPARE TO

Proprietary formulation

MODE OF ACTION

Reduces fecundity and oviposition, feeding deterrent, stomach poison

RESTRICTED USE

No

SIGNAL WORD

Caution

PACKAGING

2 x 8 lb

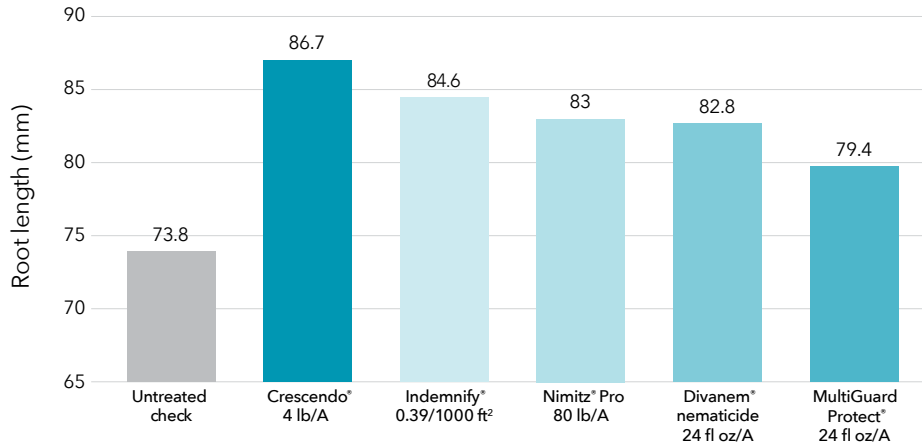

EPA REG NUMBER

84059-27-42750

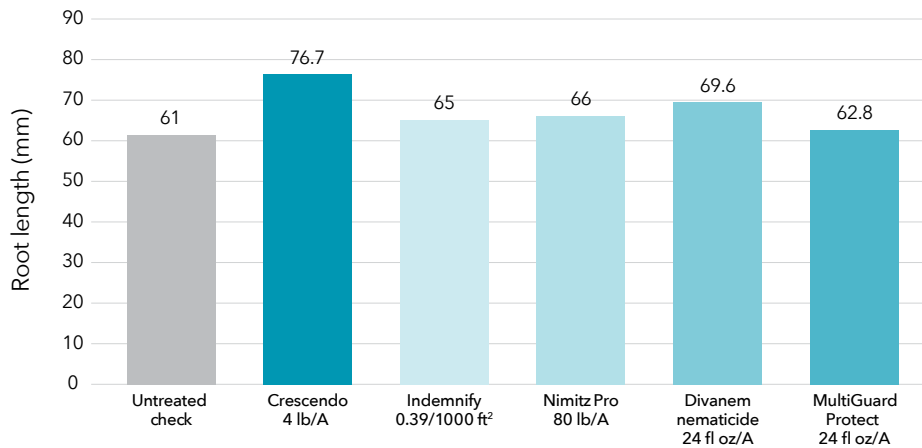

CRESCENDO®

FOR THE CONTROL OF NEMATODES AND INSECTS IN TURF AND LANDSCAPES.

Creeping Bentgrass Putting Green - Root Length
St. James Plantation, Southport, NC, 2017

Bermudagrass Putting Green - Root Length
Pine Valley Country Club, Wilmington, NC, 2017

Root plugs at right were taken from treated areas. Plugs were harvested with 1" soil probe.

LABELED NEMATODES

- Awl
- Cyst
- Dagger
- Lance
- Lesion
- Pin
- Reniform
- Root-knot
- Sting

LABELED INSECTS

- Annual bluegrass billbug
- Armyworms
- Bagworm
- Chinch bugs
- Cutworms
- Fall webworm
- Flea beetle
- Gypsy moth
- Hemlock looper
- Leafhoppers
- Mealy bugs
- Mites
- Pear psylla
- Sod webworms
- Thrips
- Whiteflies

See label for a complete list of pests controlled
