

## TECHNICAL BULLETIN

May 18, 2012

### **NUCOP 50WP**

EPA Reg. No. 45002-7

### USE ON SPINACH

This bulletin is to advise growers and applicators that Albaugh has elected to remove spinach as a labeled use site from NuCop 50WP and is now transitioning to product labels without spinach as a listed crop.

In the interim, Albaugh recommends that current NuCop 50WP inventory not be used to treat spinach crops. Albaugh recommends that growers use alternate products to control diseases in spinach.

Please contact your local Albaugh representative if you have any questions.
