

FUNGICIDE

IProdione 2F Select™

PROFESSIONAL, NON-RESIDENTIAL TURF FUNGICIDE.

Iprodione 2F Select™ is a foliar-applied fungicide that may be deployed for the control of labeled diseases on non-residential turf including golf courses, sod farms, and institutional areas. Iprodione 2F Select is compatible, and may be applied, with most commonly used registered fungicides, including TM 4.5F Select™ to control a broad spectrum of diseases and aid in resistance management.

PRODUCT FEATURES

- Up to 28 days residual control.
- Effective for all seasons.
- Non-residential use only.
- Preventive and curative effects.
- Labeled for turf and ornamental applications.

LABELED USES

- Golf Courses
- Non-residential ornamentals
- Non-residential turf
- Sod farms

See label for complete application guidelines and restrictions.

Iprodione 2F Select™

PROFESSIONAL, NON-RESIDENTIAL TURF FUNGICIDE.

APPLICATION INFORMATION

Applied according to good turf management practices, **Iprodione 2F Select™** is an effective tool in controlling spring, summer, fall, and certain winter diseases.

Summer stress complex/Summer decline

Tank-mix applications of 4 to 8 fl. oz. per 1,000 sq. ft. of Fosal Select™ fungicide with 3 to 4 fl. oz. per 1,000 sq. ft. Iprodione 2F Select™ to help manage these diseases.

Gray snow mold (*Typhula* spp.)

To use **Iprodione 2F Select** as a tank-mix in sites where continuous snow cover occurs, use 4 to 8 fl. oz. per 1,000 sq. ft. with one of the following registered products: chlorothalonil, such as **Chlorothalonil 720 Select™** or pentachloronitrobenzene (PCNB) fungicides.

Use the rates according to the directions on the labels of the registered tank mix partner products. For optimum control, application must be made in autumn, prior to snow cover. Ensure thorough coverage is attained by dilution in sufficient water (1 to 5 gallons of spray solution per 1,000 sq. ft.). If the turf has been frozen prior to application, use the higher rate of **Iprodione 2F Select**, and make a repeat application only if a thaw occurs and all snow cover has melted.

Restrictions

- **DO NOT** apply to turf cut higher than 1" on golf holes where water bodies are present.
- Except for use on golf courses, if applying this product adjacent to a water body such as a lake, reservoir, river, permanent stream, marsh or natural pond, estuary, or commercial fish pond, there must be at least a 25-foot vegetative buffer strip between the water body and the point of application.
- **DO NOT** mow or irrigate treated areas until the grass is completely dry, which typically takes 24 hours post-treatment.
- **DO NOT** mix with any sticker, extender, or wetting agents.
- **DO NOT** apply more than 35 fl. oz. product/1,000 sq. ft. per year.
- **DO NOT** apply more than 6 applications per year.
- **DO NOT** allow animals to graze on treated turf and do not feed clippings from treated turf to livestock or poultry.

LABELED TURF DISEASES

Anthracnose	<i>Fusarium</i> patch
Brown patch	Gray snow mold
Corticium red thread	Large patch
Curvularia	Leaf spot
Dollar spot	Necrotic ring spot
<i>Fusarium</i> blight	Pink snow mold

LABELED ORNAMENTAL DISEASES

Aerial web blight	<i>Cylindrocladium</i> blight and wilt	Ink spot
<i>Alternaria</i> leaf blight	Daffodil leaf scorch	Ray blight
<i>Alternaria</i> leaf spot	<i>Fusarium</i> corm rot	<i>Rhizoctonia</i> stem and root rot
Blossom blight	<i>Fusarium</i> leaf spot	Tulip fire
Botrytis blight	<i>Helminthosporium</i> Leaf spot	
Botrytis storage rot
